Overviews

Overviews of the course and all 3rd party resources used in the course are present in Start Here Module or other applicable modules.

- Third-party tools include textbooks, multimedia not developed by the instructor, publisher platforms where students access content and submit work (such as MyMathLab). It also includes any other tools, websites and technology platforms developed by an external party that we ask our students to use (like ITL or Bibliu or McGraw Hill Connect).
- An example of this might be that visual or written directions on how to successfully access and navigate MyMath Lab or ITL content are located in the first module with that activity type or in a resource module on the Course Content page.
- Specific verbiage included in descriptions of module to make it easy for students to find those instructions if they are not immediately apparent.
